

About me

I design and develop interfaces and interactive products. After several years as a UX/UI designer, specializing in design systems and mobile applications (Android and iOS Guidelines), I expanded my skills into full-stack development. I am now a certified AI Software Developer (Le Wagon), proficient in Ruby on Rails, front-end and back-end development, and LLM integration. I have also worked on webapps, including the redesign of the EDF ENR customer portal. I hold a bachelor's degree in Interaction Design and studied Data Visualization at École de Design Nantes Atlantique.

Experience

Ux - Ui Designer — Freelance

REMOTE - QUENTINLU.FR
 MAR 2025 - NOW

- Ux research
- Design System
- Mobile app, Connected glasses
- Ui design, Prototyping
